

Amendments to the Claims:

The following listing of claims replaces all prior versions and listing of claims in the application.

Listing of Claims:

1-12. (Cancelled)

13. (Currently Amended) A chamois, comprising:

a first cloth layer;

the first cloth layer being relatively elastic and having a garment facing side;

a second cloth layer;

the second cloth layer being relatively elastic and having at least one relatively inelastic portion, the second cloth layer having a body facing side;

a first foam layer;

the first foam layer coupled to the first cloth layer and including a garment facing side contacting a body facing side of the first cloth layer;

the first foam layer located between the first cloth layer and the second cloth layer;

the first foam layer being relatively elastic such that the chamois stretches;

at least one foam pad; and

the at least one foam pad being coupled to the first foam layer and positioned between the first foam layer and the second cloth layer, the at least one foam pad including a garment facing side contacting a body facing side of the first foam layer and a body facing side contacting a garment facing side of the second cloth layer;

the at least one foam pad substantially aligned with the at least one relatively inelastic portion, such that the at least one foam pad is inhibited from stretching.

14. (Currently Amended) The chamois of claim [[13]] 58, wherein the at least one foam pad is relatively inelastic.

15. (Original) The chamois of claim 13, wherein the at least one foam pad is elastic.

16. (Currently Amended) The chamois of claim [[13]] 58, wherein at least the second cloth layer contains an anti-microbial material.

17. (Original) The chamois of claim 13, wherein the first cloth layer comprises a relatively inelastic portion substantially aligned with the at least one foam pad.

18. (Original) The chamois of claim 14, wherein the at least one foam pad is relatively denser than the elastic foam layer.

19. (Original) The chamois of claim 14, wherein the at least one foam pad comprises multiple densities at least one of which is denser than the elastic foam layer.

20-49. (Cancelled)

50. (Currently Amended) The chamois of claim [[13]] 58, wherein the chamois is flexible.

51-54. (Cancelled)

55. (Previously Presented) The chamois of claim 13, further comprising:

a second foam layer;

the second foam layer coupled to the second cloth layer and located between the at least one foam pad and the second cloth layer; and

the second foam layer being relatively elastic such that the chamois stretches.

56. (Previously Presented) The chamois of claim 55, wherein the first foam layer and the second foam layer comprise the same type of foam.

57. (Currently Amended) The chamois of claim [[13]] 58, further comprising the first foam layer coupled to the second cloth layer.

58. (New) The chamois of claim 13, wherein:

the garment facing side of the first foam layer solely contacts the body facing side of the first cloth layer;

the first foam layer defines a first perimeter;

the at least one foam pad defines a second perimeter; and

the first perimeter encompasses the second perimeter.
